PROFESSIONAL SUMMARY

Pre-final-year B.Tech CSE (AI & ML) student (2028 batch) with strong Python and Java fundamentals. Built the Django + MySQL backend of a fleet and transport operations platform, and image-evidence checks for site photos in an anomaly-detection platform. Works with OpenCV, PyTesseract (OCR), scikit-learn and REST APIs; learns new tools quickly through hackathons.

EDUCATION

B.Tech — CSE (AI & ML) | Gouthami Institute of Technology and Management for Women | 2024–2028 | 90.89%

Diploma — Computer Engineering | Gouthami Institute of Technology and Management for Women | 2022–2025 | 95.02%

SSC / 10th Class | YVS Girls High School | 2022 | 81.70%

TECHNICAL SKILLS

Programming	Java (OOP & fundamentals), Python, JavaScript
Computer Vision & ML	OpenCV, PyTesseract (OCR), NumPy, Pandas, Matplotlib, Scikit-learn · regression & classification models, anomaly detection (Isolation Forest)
Backend & Frameworks	Django, FastAPI, Node.js/Express · REST APIs, CRUD modules, Django ORM & admin
Web Development	HTML, CSS, JavaScript, React
Database	MySQL, MongoDB
Tools	Git, GitHub, VS Code, Render, Netlify
Computer Fundamentals	OOP, data structures & algorithms, REST APIs, software development fundamentals

PROJECTS

MPLAD Sentinel — *AI-Powered Project Monitoring & Integrity Platform* | [GitHub \(team repo\)](#)

Built a platform that compares sanctioned project plans with contractor-reported progress and flags risky cases for officers using a rule engine and Isolation Forest anomaly analysis (React/TypeScript, Node.js/Express, MongoDB). Built the image-evidence demo that checks site photos for reuse (SHA-256, perceptual hashing), GPS location mismatch and implausible timestamps.

TransitOps — *Smart Transport Operations Platform (Odoo Hackathon 2026)* | [GitHub](#)

Owned the backend in a team project: set up Django with MySQL; built the vehicle, driver, trip, maintenance, fuel and expense models, CRUD modules and dashboard analytics and reports; connected the dashboard UI to live data.

FindIt AI — *AI-Powered Lost & Found Platform*

Built a MERN lost-and-found platform with user authentication, item reporting and search, claim management and AI-assisted features.

Serve Sync — *Canteen Management Application*

Team project: canteen ordering app where students place and track orders live and admins manage the menu (React, FastAPI, MongoDB, JWT).

INTERNSHIP EXPERIENCE

CodeAlpha — Data Science Intern | Duration: 1 Month

- Built Car Price Prediction (regression) and Iris Flower Classification models, and an Unemployment Analysis for India, in Python.
- Applied Pandas, NumPy, Matplotlib/Seaborn and machine-learning workflows for data cleaning, exploratory analysis, visualization, model training, evaluation, and prediction.

AI/ML Engineer Internship | Pluto Academy | Duration: 1 Month

- Worked on practical AI/ML development tasks and applied machine-learning concepts through project-based implementation.

LEADERSHIP & INITIATIVES

SLTC — Student-Led Technical Community | Founder / Community Lead

Initiated “BY STUDENTS • FOR STUDENTS” to create a peer-learning space where students share technical knowledge, conduct practical sessions, collaborate, and grow together. Worked with a five-member founding team.

ACHIEVEMENTS & HACKATHONS

- Eureka Ideathon — 3rd Prize.
- Smart India Internal Hackathon — Selected among the Top 10 teams in the internal college round; received an appreciation certificate.
- Siddharth Institute Hackathon — Ranked 37th among 300 participants.
- Hackathon participation (offline): VITS College 24-Hour Hackathon; Siddharth Institute 24-Hour Hackathon; Smart India Internal Hackathon; Coimbatore Institute Hackathon.
- Hackathon participation (online, first round): Microsoft Hackathon; Odoo Hackathon (TransitOps).
- Poster Presentation — JNTU Pulivendula.
